MAJOR CLASSIFICATION INDEX OF ARTICLES

ANALYTICAL METHODS

Accumulation chamber measurements of CH_4 fluxes 45-54
Anodic stripping to predict the bioavailable/toxic concentration of Cu in water 1215-1223
Evaluation of sequential and selective extraction methods for determination of Hg speciation and mobility in mine waste 567-576
Rapid determination of Th, U, Cd and Mo in sediments 539-549

ENERGY RESOURCES

Geothermal

Decarbonation of geothermal waters by seeding 1137-1148
Laboratory investigation of silica removal from geothermal brines 1597-1612

Petroleum and natural gas

Hydrothermal petroleum in sediments of the Andaman Backarc Basin 845-861
Origin of crude oils from Shuguang-Huanxiling Buried Hills, Liaohe basin, China 445-456

ENVIRONMENTAL GEOCHEMISTRY

Adsorption of heavy metals by the mineral matrix of tropical soils 795-804
Aqueous geochemistry of Udden pit lake, northern Sweden 97-108
As enrichment in waters and sediments of Rio Loa, Second Region, Chile 1399-1416
As in Fe cements developed within tailings 395-408
As speciation in surface waters and sediments in a contaminated waterway 1387-1397
Baseflow and stormflow metal fluxes from agricultural catchments 483-501
Carbon isotope and C/N ratios in suspended matter in rivers, an indicator of seasonal change 1241-1249
Biogeochemistry of manganese oxide coatings on pebble surfaces 1541-1554
Characterization of limestone reacted with acid mine drainage in a pulsed limestone bed treatment system 1705-1721
CO_2 and ^{13}C in urban atmosphere, Dallas, Texas, U.S.A. 75-95
Comparison of acid-base behaviour and metal adsorption of a gram-negative bacterium with other strains 527-538
Constraints on neutralisation processes in sediments of acidic waters 25-36
Dissolution kinetics of schwertmannite and ferrihydritre in oxidised mine samples and their detection by DXRD 1531-1540
Distinguishing between natural and anthropogenic sources of metals entering the Irish Sea 283-309
Effect of reducing conditions on metal release from waste solids 383-394

Effect of SO_4 on ferrihydrite adsorption of Cu, Pb and Zn 1671-1689
Environmental quality of a river system polluted by mining 749-764
Evidence for Cl recycling in a forested wet zone, Canadian Shield 1027-1042
Fate and significance of contaminant metals from tailings release, Romania 241-257
Fingerprinting of petroleum from pipeline releases 915-926
Geochemical and mineral magnetic characterisation of urban sediment particulates 269-282
Geochemical controls on As distribution in a catchment affected by past mining 1373-1386
Geochemical cycling of P in rivers 739-748
Geochemical factors controlling PCBs in intertidal sediments 327-338
Geochemical reactions governing the fate of Co-NTA in contact with natural materials 423-433
Geochemistry and petrography of P in urban canal bed sediment 259-267
Geochemistry of As in U mine tailings 1733-1750
Geochemistry of infiltrating water in remediated tailings 659-674
Heavy metals in river sediments polluted by AMD 409-421
Hg contamination of soils and sediments from Au mining 371-381
Historical trends of metal pollution recorded in estuarine sediments 577-588
Humic acid coagulation: influence of divalent cations 1573-1582
Humidity changes in southern Tunisia in Late Pleistocene 1691-1703
Hydrogen isotope fractionation of petroleum hydrocarbons during vaporisation: implications for assessing remediation of petroleum contamination 1641-1651
Impact of tailings dam spills and clean up on sediment and river water, Aznalcóllar, Spain 221-239
Influence of microbial hydroxamate siderophores on Pb(II) desorption from á-FeOOH 1751-1756
Isotopic investigations of carbonate growth on concrete 435-444
Kinetic dissolution of carbonates and Mn oxides in acidic water 1225-1239
Leaching of trace elements from As-bearing tailings 1361-1371
Long-lived I and Pu isotopes in vegetation around a nuclear reprocessing plant 1867-1873
Metal geochemistry in a mine-polluted estuary in Spain 1757-1771
Metals in sediments of Ensenada de San Simón, Galicia, Spain 973-996
Methods for the study of metal pollution in marine sediments 781-794
Mobility of ^{226}Ra and trace metals in pre-oxidised subaqueous U mill tailings 1095-1110
Natural attenuation of As in drainage from an abandoned As mine dump 1267-1278
Neutralisation of acid mine drainage with alkaline industrial residues 1197-1213
Partitioning of trace metals between particulate, colloidal and dissolved fractions in a polluted river 457-470
Potential for travertine formation: Fossil Creek, Arizona 1081-1093
Pt, Pd and Au in pine needles, Palermo, Italy 109-116
Reconstructing historical trends in metal input in heavily-disturbed contaminated estuaries 311-325
Role of secondary minerals in controlling migration of As and metals from sulfide wastes 1347-1359
Similarity between C, N and S isotopes in forest soils, implications for use of ^{34}S as a tracer 765-779

Solid state partitioning of contaminant metals and As in channel sediments of a mining affected drainage basin 1583-1595
Sorption and distribution of adsorbed metals in 3 Indian soils 1723-1731
Storage of nutrients and contaminants in fluvial sediments 195-220

Archaeological geochemistry

Assessment of solubility profiling as a decontamination procedure for $^{87}Sr/^{86}Sr$ analysis of archaeological skeletal tissue 653-658
Contamination of prehistoric human teeth at a Swiss necropolis 353-370

Diagenesis

Characterisation and diagenesis of strong-acid carboxyl groups in humic substances 471-482
Diagenetic cycling of As in the sediments of eutrophic Baldeggersee, Switzerland 1497-1506
Diagenetic mobility of trace elements in sediments covered by a flash flood deposit 1011-1026
Metal distribution during diagenesis in contaminated sediments 901-913

Geochemical mapping

Application of exploratory data analysis (EDA) for geochemical mapping 1185-1195
Heavy metal contaminated soils associated with drained fenland in Lancashire, England, UK 1663-1670
Multifractal IDW interpolation and fractal filtering method in environmental studies, regional geochemical mapping 1853-1865
Spatial distribution of soil organic carbon concentrations in grassland of Ireland 1629-1639

Groundwater

Aquatic geochemistry of As in volcanic groundwaters, Italy 1283-1296
As enrichment in groundwater of West Bengal India 1417-1434
As in surface and up to 90°C groundwaters in a basalt area, Iceland 1297-1312
Changes in isotope ratio and content of dissolved He through groundwater evolution 719-738
Controls on groundwater chemistry, Cripple Creek, Colorado 1-24
Degradation of carbon tetrachloride in reducing groundwaters 503-525
Delineating karstic flow using SO_4 and ä^{34}S 145-153
Effect of groundwater fulvic acid on adsorption of arsenate 1507-1515
Geochemistry and mixing of leakage in a semi-confined aquifer at a municipal well field 1043-1063
Groundwater As mobilisation in the Bengal Delta Plain, use of ferralite as a possible remedial measure 1435-1451
Groundwater evolution in the Continental Intercalaire aquifer 805-822

Iron oxide incrustations in wells, Part 1 927-939
Iron oxide incrustations in wells, Part 2 941-954
Mobilisation of As and other trace elements in fluviolacustrine aquifers of the Huhhot Basin, Inner Mongolia 1453-1477
Natural and anthropogenic factors affecting groundwater quality of an active volcano 863-882
Paleoclimatic interpretation of the past 30 ka from isotopic studies of a deep confined aquifer 997-1009
Phosphate based immobilisation of uranium in an oxidising bedrock aquifer 823-843
Pore water chemistry in argillaceous rocks 55-73
REE as indicators of groundwater environment changes 135-143
Source and transport of As in a bedrock aquifer, New Hampshire, USA 1773-1787
REE and Y hydrostratigraphy along the Lake Kenneret-Dead Sea-Arava transform fault 1613-1628
Sr isotopes and REE as tracers of groundwater-lake water interaction 1789-1805
Sr isotopes in spring and mineral waters Monte Vulture volcano, Italy 117-125
Thallium transfer processes and their impact on ecosystems 675-691
Use of ^{3}H and ^{18}O to characterise water inflows in Alpine tunnels 339-351
Vertical distribution of As(III) and As(V) in a coastal aquifer 1479-1496

Radioactive waste disposal

Effect of confining pressure on the diffusion of HTO, $^{36}Cl^-$ and $^{125}I^-$ in a layered argillaceous rock 1653-1662
Influence of mineral precipitation and dissolution on hydrologic properties of porous media 589-606
Mobilisation and mechanisms of retardation in the Oklo natural reactor zone 2 (Gabon) 1807-1824
U-series in Fe-U rich fracture fillings from the oxidised cap of a U deposit, implications for processes in a radwaste repository 1251-1266

Thermal water

As trapping by Fe oxyhydroxides and carbonates at hydrothermal spring outlets 1313-1323
Reaction path modelling in the As-S system: a case study for geothermal As transport 1325-1345

Waste disposal

Ankara clay as a landfill liner 711-717
B and Li isotopes as groundwater tracers at Fresh Kills landfill, Staten Island 615-627
CO_2 reactions in model brine; implications for geologic sequestration of C 1065-1080
Heat-induced changes in speciation and extraction of U from sheet silicates 1121-1135

Rate measurements and detection of gas microseepages to the atmosphere from an enhanced oil recovery/sequestration project 1825-1838
Thermodynamic stability of waste glasses compared to leaching behaviour 1165-1184

Weathering

Redistribution of trace metals in a mineralised spodosol due to weathering 883-899
Weathering release of heavy metals from soil 607-613

GENERAL GEOCHEMISTRY

Uranium-series fractionation in mafic extrusives 127-134

Marine

Pyritization of Fe, Mn, and trace metals in marine sediments 1149-1163
Scavenging of heavy metals in deep-sea bottom sediments 693-710

MINERAL RESOURCES

Exploration

Geochemical anomaly identification 37-44

MODELLING

Calculation of surface area of soil fractions 629-651
Computer modelling of methanotrophic oxidation of hydrocarbons in the saturated zone from an enhanced oil recovery/sequestration project 1839-1852
Modelling ion exchange properties and indirect determination of the interstitial water composition of an argillaceous rock 1517-1530
Modelling the hydrogeochemistry of acquitards 551-563
Reactive transport modelling of the interaction of a high pH plume and a fractured marl 1555-1571

REVIEWS

Effects of organic matter heterogeneity on sorption and desorption of organic contaminants by soils and sediments 955-972
Pesticides and other micro-organic contaminants in freshwater sediments 159-194

OTHER TOPICS

Critical comment

1111-1116

Guest editorial

1281-1282

Preface

155-157

Reply to critical comment

1117-1119

Acid lake water, neutralisation 25
Acid mine drainage 1, 221, 395, 409, 675, 749, 1225, 1267, 1347, 1757
    microbial activity, effect on 1757
    treatment, with alkaline industrial residue 1197
        with limestone 1705
Aegean Sea, Greece 781
Agricultural practices, environmental contamination from 483
Agrio river, southern Spain 221
    heden, Sweden 765
Aitik Cu mine, Sweden 883
Al
    extractable from heavily fertilized soils 1541
    in acid mine/rock drainage 1, 675, 1705
    in aquifer sediment 1453
    in biodeposited sediment 973
    in estuary sediment 311, 577, 973
    in Fe oxide/hydroxide 395
    in fluvial sediment 221, 457, 973, 1399
    in groundwater 1, 675, 805, 1225, 1453, 1497
    in hydrothermal fluid 1325
    in marine sediment 693
    in metallurgical slag 383
    in natural nuclear reactor 1807
    in ochre 1705
    in pebble coatings 1541
    in river and stream water 221, 483, 659, 675, 1267, 1373
    in tailings 659, 1197, 1347, 1733
    in waste glass 1165
Alberta, Canada 1027
Algeria 805, 1185
Alkanes, light, flux from enhanced oil recovery project 1825, 1839
Alps, France, Italy, Switzerland 339
Amazon 381
Andaman Backarc Basin, Indian Ocean 845
Anglesey, Wales, U.K. 901
Ankara, Turkey 711
Anodic stripping voltammetry, to determine labile Cu 1215
Anoxia, in marine sediment 539
Arava Valley, Israel 1613
Arizona, U.S.A. 1081, 1225
As
    human health problems of 1399, 1417, 1435, 1453
    immobilisation in precipitates from hydrothermal springs 1313
    in acid mine/rock drainage 675
    in aquifer sediment 1435, 1453
    in dust 883
    in estuary sediment 311, 901
    in Fe oxide/hydroxide 395, 1453
    in fjord sediment 1011

in fluvial sediment 283, 409, 1185, 1387, 1399, 1583
in groundwater 659, 675, 823, 1283, 1297, 1399, 1417, 1435, 1453, 1497, 1507, 1773
in lake sediment 1497
in lake water 1497
in pebble coatings 1541
in pegmatite 1773
in pit lake water 97, 1399
in potable water 1417, 1435, 1453
in precipitates from hydrothermal springs 1313
in river and stream water 483, 675, 1267, 1373, 1387, 1399
in tailings 395, 659, 1347, 1361, 1733
in thermal water/fluid 1325, 1399
in till 659, 883
in volcanic rocks 1297
in well incrustations 927
mobility in tailings 1095, 1347, 1361, 1361, 1733
natural attenuation, in drainage 1267
release from sediment during diagenesis 1011, 1497
release into groundwater 1417, 1435, 1479, 1773
removal from potable water with Fe-rich soil 1435
sorption
by Fe oxide 1417, 1435, 1773
effect of fulvic acid on 1507
speciation
in water 1283, 1297, 1313, 1325, 1387, 1435, 1453, 1497, 1773
in tailings 1373, 1733
Atlas Mountains, Algeria 805
Au, in pine needles 109
Aubure, France 765
Australia, New South Wales 1497

B
in acid mine/rock drainage 675
in groundwater 55, 615, 675, 805, 863, 1297, 1399, 1453
in river and stream water 675
in tailings 1733
in thermal water/fluid 1325, 1399
in waste glass 1165
^{11}B, in groundwater 615
